

June 2021 ACS Rail Updates

Welcome to the **June 2021** edition of ACS Rail updates.

The following pages contain summaries of updates which may be relevant to you. Please brief and distribute this information to the relevant people as per your internal procedures.

The ACS Team

BRIEFING REQUIREMENTS:

NOTE: Contractors are responsible for arranging and undertaking and recording their own Safety and Awareness Briefings in accordance with their own processes and procedures.

Changes to Network Rail Standards

Issue 120: 05th June 2021 – 03rd September 2021

Making sure you are aware of the relevant standards

Every employee has a duty to comply with any mandatory Network Rail company standards and procedures relevant to their role. It is vital therefore that all employees are aware of which standards are relevant to their area of work, and where to find them.

Welcome to the Network Rail Standards Portal

Network Rail Standards are now made available free of charge to all Network Rail suppliers and partner organisations via this online portal:

https://global.ihs.com/csf_home.cfm?&csf=NR

For this access you will need to do the following:

- Create an online account by clicking My Account and selecting Create New Account.
- Search for the standard(s) that you wish to obtain and click Add to Cart
- When you have finished shopping, click on Cart then click on View Shopping Cart
- In the Membership Information section of the shopping cart, enter your Company Registration Number in the Membership# box and click the Add button

At that point, a 100% discount will be applied to your order, and you may proceed to checkout. All first-time users will need to be verified for eligibility before receiving the standard(s) ordered. This may take up to seven days. Once your eligibility has been verified you will receive an e-mail with a link to the PDF of the standard.

NOTE: Organisations with access to the online collection of Network Rail Standards delivered via IHS Markit's Engineering Workbench platform should continue to access standards via that service.

You must make sure that the team and the activities for which you are responsible comply with the Network Rail company standards and procedures. By doing this, you will be complying with the Network Rail Health & Safety Management System and relevant legislation.

The following pages contain summary extracts of the changes / new issue to the Network Rail Company Standards which may be relevant to you.

Standards Updates

Issue 120 - 05 June 2021 New and Up-Issued Standards

References	Title	Replaces
NR/GN/CIV/065 Issue 1	Examination of Earthworks Guidance Manual	new
NR/GN/CIV/200 Issue 3	Station Design Manual	NR/GN/CIV/200 Issue 2

Emergency Changes (Previously Known as Letters of Instruction)

To access any active Emergency Change you need to refer to its associated Network Rail Standard. The front page of the standard will provide details of the relevant change. When using the online service there will be an active link to each relevant change.

RSSB - Standards and the rail industry

Access all current (and many withdrawn) Railway Group Standards, Rail Industry Approved Codes of Practice (RACOPs), Guidance Notes (GNs) and Rail Industry Standards (RISs).

<http://www.rssb.co.uk/railway-group-standards>

Useful links:

- [Catalogues](#)
- [Latest Updates to Standards](#)
- [Using Standards](#)
- [Finding and staying up-to-date with standards](#)

Railway Group Standards (RGSs)

Mandatory requirements for the GB mainline railway system are defined in Railway Group Standards (RGSs). They facilitate the management and operation of the mainline railway as a shared system. RGSs set out technical requirements applicable to vehicles or the infrastructure, or processes applicable to transport operators.

Standards Catalogue <http://www.rssb.co.uk/railway-group-standards>

Rule Book (GE/RT8000)

The Rule Book (GE/RT8000) and other National Operations Publications are documents that contain direct instructions for railway staff.

The Rule Book is held in printed copy by over 100,000 people, and as such is probably the best known and most widely distributed in the entire RSSB catalogue. Even greater numbers of people are known to use it as a reference and information document both from the United Kingdom and abroad using the online version.

You can still order hard copies of individual standards and Rule Book modules or handbooks from Willsons External link (Tel: 01636 702334) or download them from the Railway Group Standards section of this site.

Rule Book App

Get 24/7 access to the Rule Book via your phone, tablet, desktop or laptop with the Rule Book App. It's easy to use, search, personalise and update, and you can acknowledge amendments with one touch. Find out more on our dedicated [Rule Book App page](#).

Rule Book Briefing Leaflet

[GERT8000-RBBL Iss 35.1](#)

This Leaflet contains details of a change to section 4.2 of module SS2 being published in the June 2021 Periodical Operating Notice. A new requirement has been introduced to check that both facing and trailing hand-points are in the correct position before a shunting movement commences, which will prevent any movement 'pushing through' trailing points.

GE/RM8000 Master Module Manual

RSSB has produced this manual to provide end-users with access to the content of GE/RT8000 (The Rule Book) that is relevant to all roles as defined in the Rule Book Matrix published by RSSB:

[Rule Book Module Matrix](#)

Controlled Documents

Modular Rulebook GE/RT8000

PTS Only

In most cases only PTS handbook is required, unless one of the following applies:

1. Index, amendment module and Module *G1* to be issued to the following:

Supervisors and managers who issue publications
Staff who operate signal post replacement switches
Staff who place protection for Line Blockage or T3
Staff who secure points
Those who use tents on or near the line

2. Index and amendment module to be issued to the following:

Lookouts
People who take charge of cranes and equipment which could foul an open line
People who take charge of work on or near points
People who carry out patrolling/inspecting duties

Other competencies (IWA, COSS, PC, ES, MC, CC)

Doc No & Issue	Issue Date	Title	Synopsis
GERT8000-Issue Iss 32	Mar 2021	Rule Book Module Issue History	This document contains updates to align with changes to Rule Book Module issues (GERT8000).
GERT8000-Issue HB Iss 13	Mar 2021	Rule Book Handbook Issue History	This document has been updated to incorporate changes to handbooks published in March 2021.
GERT8000-RBBL Iss 35	Mar 2021	Rule Book Briefing Leaflet	This Leaflet contains details of changes to the Rule Book (GERT8000) being published in March 2021 and in force June 2021.
GERT8000-RBBL Iss 35.1	Jun 2021	Rule Book Briefing Leaflet	This Leaflet contains details of a change to section 4.2 of module SS2 being published in the June 2021 Periodical Operating Notice. A new requirement has been introduced to check that both facing and trailing hand-points are in the correct position before a shunting movement commences, which will prevent any movement 'pushing through' trailing points.
GERT8000-Gloss Iss 5	Sep 2018	Glossary of Railway Terminology	The Glossary has been updated to reflect changes in terminology within TW5 which removes 'entering service' and replaces it with 'starting a journey'.
GERT8000-AC Iss 6.pdf	Sep 2020	AC electrified lines	You will need this module if you carry out the duties of a train driver, guard, shunter, designated person (DP), signaller, crossing keeper or person in charge of sidings in AC electrified areas. "Sections 12 and 13 have been revised in two main areas. The first is avoiding a need for a driver to leave the cab for inspection purposes, or circumstances in which a driver might be allowed to leave the cab for inspection purposes before the traction current has been removed. The second is managing the removal of traction current in a way that reduces the extent of reactionary delay. The changes are intended to reduce the electrical and non-electrical safety risk overall and to reduce the adverse operational impacts caused by stranded trains. A minor amendment has been made to Section 3.3 to recognise that not all frontline staff are able to speak directly to the ECO, in which case they should inform the signaller when reporting objects and defects. An incorrect reference to red bonds has also been revised in the same section.
GERT8000-DC Iss 4	Sep 2015	DC electrified lines	You will need this module if you carry out the duties of a train driver, guard, shunter, designated person (DP), signaller, crossing keeper and person in charge of sidings in DC electrified areas. This document has been updated as part of the December 2015 Rule Book Programme.

Controlled Documents

Doc No & Issue	Issue Date	Title	Synopsis
GERT8000-G1 Iss 8	Mar 2021	General safety responsibilities and personal track safety for non-track workers	You will need this module if you carry out the duties of a train driver, guard, shunter, designated person (DP), signaller, crossing keeper, or platform staff.
GERT8000-HB1 Iss 6	Mar 2021	General duties and track safety for track workers	this handbook is for those personnel who need to go on the operational railway to carry out their duties, with the exception of a train driver, guard, shunter, signaller, crossing keeper or designated person (DP).
GERT8000-HB10 Iss 4	Sep 2015	Duties of the COSS or SWL and person in charge when using a hand trolley	You will need this handbook if you are the COSS or SWL and person in charge when using a hand trolley. This document has been updated as part of the December 2015 Rule Book Programme.
GERT8000-HB11 Iss 8.pdf	Sep 2020	Duties of the person in charge of a possession (PICOP)	You will need this handbook if you carry out the duties of the PICOP. Section 4.2 has been revised to facilitate the introduction of the flexible train arrival point (FTAP) into the Rule Book. Section 12.1 has been revised to include arrangements for giving up a work site with an engineering train or on-track machine standing within it. The changes are intended to allow work to be undertaken for a greater proportion of the available time within a possession.
GERT8000-HB12 Iss 8.pdf	Sep 2020	Duties of the engineering supervisor (ES) or safe work leader (SWL) in a possession	You will need this handbook if you carry out the duties of the ES or SWL in a possession. Section 3.2 has been revised to facilitate the introduction of the flexible train arrival point (FTAP) into the Rule Book. Section 10.3 has been revised to include arrangements for giving up a work site with an engineering train or on-track machine standing within it. The changes are intended to allow work to be undertaken for a greater proportion of the available time within a possession. A new section 11 has been added to facilitate the introduction of high output protection zones into the Rule Book. The introduction of high output protection zones into the Rule Book is intended to improve track worker safety by removing the need for possession support staff to go trackside to place standard possession protection, and to result in improved productivity on each occasion that a high output train is used.
GERT8000-HB13 Iss 2	Sep 2014	Duties of the person in charge of the siding possession (PICOS)	You will need this handbook if you carry out the duties of a PICOS. Information on changes to this issue can be found in the Rule Book Briefing Leaflet (GERT8000-RBBL Iss 27)
GERT8000-HB14 Iss 3	Mar 2021	Duties of the person in charge of loading and unloading rail vehicles during engineering work	You will need this handbook if you carry out the duties of the person in charge of loading and unloading rail vehicles during engineering work.
GERT8000-HB15 Iss 5	Sep 2017	Duties of the machine controller (MC) and on-track plant operator	You will need this handbook if you carry out the duties of the machine controller (MC) and on-track plant operator. This document has been updated as part of the December 2015 Rule Book Programme.
GERT8000-HB16 Iss 4	Sep 2018	AC electrified lines	This handbook is for those personnel who need to go on the operational railway in an AC electrified area to carry out their duties.
GERT8000-HB17 Iss 3	Sep 2015	DC electrified lines	This handbook is for those personnel who need to go on the operational railway in a DC electrified area to carry out their duties. This document has been updated as part of the December 2015 Rule Book Programme.
GERT8000-HB18 Iss 4	Sep 2015	Duties of a Level Crossing Attendant	You will need this handbook if you carry out the duties of a level crossing attendant. This document has been updated as part of the December 2015 Rule Book Programme.
GERT8000-HB19 Iss 4.pdf	Sep 2020	Work on signalling equipment - duties of the signalling technician	You will need this handbook if you carry out the duties of a signalling technician. Section 1.5 has been revised to facilitate the introduction of high output protection zones into the Rule Book. The introduction of high output protection zones into the Rule Book is intended to improve track worker safety by removing the need for possession support staff to go trackside to place standard possession protection, and to result in improved productivity on each occasion that a high output train is used.
GERT8000-HB2 Iss 2	Sep 2015	Instructions for track workers who use emergency protection equipment	This handbook is for those personnel who need to go on the operational railway to carry out their duties and have been trained to carry out emergency protection. It does not apply to: train drivers, guards, shunters, signallers, crossing keepers and those who act as a designated person (DP). This document has been updated as part of the December 2015 Rule Book Programme.

Controlled Documents

Doc No & Issue	Issue Date	Title	Synopsis
GERT8000-HB20 Iss 3.pdf	Sep 2020	General duties of a safe work leader (SWL) working outside a possession	You will need this handbook if you have the general duties of a safe work leader working outside a possession. New instructions have been added at section 2.3 to facilitate the introduction of the crossing the line procedure into the Rule Book. The changes are intended to streamline the procedure for crossing the line leading to reduced workload for signaller/SWL/COSS/IWA, reduced need for staff to be waiting unproductively trackside, and crossing the line at locations that have already been assessed as suitable.
GERT8000-HB21 Iss 4	Sep 2018	Safe work leader (SWL) blocking a line	You will need this handbook if you are a safe work leader (SWL) blocking a line.
GERT8000-HB3 Iss 3	Sep 2014	Duties of the lookout and site warden	This handbook is for those personnel who have duties of the lookout and site warden. Information on changes to this issue can be found in the Rule Book Briefing Leaflet (GERT8000-RBBL Iss 27).
GERT8000-HB4 Iss 2	Sep 2014	Duties of a points operator and route-setting agent - moving and securing points by hand	This handbook is for those personnel who has duties of a points operator and route-setting agent - moving and securing points by hand. Information on changes to this issue can be found in the Rule Book Briefing Leaflet (GERT8000-RBBL Iss 27).
GERT8000-HB5 Iss 2	Sep 2011	Handsignalling duties	This handbook is for those who carry out handsignalling duties.
GERT8000-HB6 Iss 6.pdf	Sep 2020	General duties of an individual working alone	This handbook is for those personnel with general duties of an individual working alone (IWA). New instructions have been added at section 2.5 to facilitate the introduction of the crossing the line procedure into the Rule Book. The changes are intended to streamline the procedure for crossing the line leading to reduced workload for signaller/SWL/COSS/IWA, reduced need for staff to be waiting unproductively trackside, and crossing the line at locations that have already been assessed as suitable. Section 3.2 has been revised to facilitate the introduction of high output protection zones into the Rule Book. The introduction of high output protection zones into the Rule Book is intended to improve track worker safety by removing the need for possession support staff to go trackside to place standard possession protection, and to result in improved productivity on each occasion that a high output train is used.
GERT8000-HB7 Iss 7.pdf	Sep 2020	General duties of a controller of site safety (COSS)	This handbook is for those personnel who have the general duties of a controller of site safety (COSS).
GERT8000-HB8 Iss 7	Sep 2017	IWA, COSS or PC blocking a line	You will need this handbook if you carry out the duties of a IWA, COSS or PC blocking a line.
GERT8000-HB9 Iss 7	Sep 2019	IWA or COSS setting up safe systems of work within possessions	You will need this handbook if you carry out the duties of an IWA or COSS setting up safe systems of work within possessions.
GERT8000-OTM Iss 10	Mar 2021	Working of on-track machines (OTM)	You will need this module if you carry out the duties of a driver of an on-track machine, an operator of an on-track machine, or a signaller.
GERT8000-T10 Iss 4	Sep 2014	Duties of a designated person (DP) and people working on rail vehicles	You will need this module if you carry out the duties of a designated person and people working on a rail vehicle. Information on changes to this issue can be found in the Rule Book Briefing Leaflet (GERT8000-RBBL Iss 27).
GERT8000-T3 Iss 9.pdf	Sep 2020	Possession of a running line for engineering work	You will need this module if you carry out the duties of a driver or signaller. Sections 2.2 and 9.7 have been revised to facilitate the introduction of the flexible train arrival point (FTAP) into the Rule Book. Section 9.8 has been revised to include arrangements for giving up a work site with an engineering train or on-track machine standing within it. The changes are intended to allow work to be undertaken for a greater proportion of the available time within a possession. A new section 10 has been added to facilitate the introduction of high output protection zones into the Rule Book. The introduction of high output protection zones into the Rule Book is intended to improve track worker safety by removing the need for possession support staff to go trackside to place standard possession protection, and to result in improved productivity on each occasion that a high output train is used

Network Rail Safety Central – Information Section

Code of Conduct

The Code of Conduct establishes some minimum standards that Network Rail expects in their supply chain. It has been developed by Network Rail's National Supply Chain, Industry bodies, and the Unions. It will be reviewed and updated by members of these same groups bi-annually. Please email queries to codeofconduct@networkrail.co.uk

Network Rail Safety Bulletins

In this section you'll find copies of the Network Rail safety bulletins regularly sent out to staff working on the Network Rail infrastructure. These cover a range of different safety issues and are often issued in response to a specific incident.

<https://safety.networkrail.co.uk/tools-resources/safety-bulletins/>

The following link contains a list of Network Rail Safety Bulletins : [Safety Bulletin List June 05](#)

You can refine your search by:

Bulletin type

- Archive - Lessons Learnt
- Archive - Safety Bulletins
- Safety Advice
- Safety Alert
- Safety Bulletin
- Shared Learning

There will also be an archive of past bulletins, so you can download any that you missed, or want to read again. **Please download them for the FULL TEXT OF THE BULLETINS.**

Lessons Learnt / Shared Learning

Network Rail are now producing 'Lessons Learnt' publications following events which have led to Formal investigations or local investigations where significant points of learning have resulted. Network Rail believes that these lessons will be of value for all involved in the industry and not just safety professionals, they are ultimately designed to aid prevention of events of a similar nature happening again elsewhere.

Safety Films

<http://safety.networkrail.co.uk/Alerts-and-Campaign/Safety-Films>

In this section you will find all the safety films which are also listed in the relevant subject areas with supporting materials. Please note some of these films contain strong language and scenes which viewers might find upsetting. As such we recommend that these films are only viewed by people over the age of 16.

Have you got a good idea for a film? If you have, write into safety.central@networkrail.co.uk to let us know.

Resource Library

<https://safety.networkrail.co.uk/tools-resources/resource-library/>

The Resource Library holds a wealth of information.

SCO 24:7 (Supply Chain – Operations) Telephone

SCO 24:7 (formally the NSC247 and NDS24:7): call 01908 723500 or 085 65500 (internal)

SCO 24:7 operates 24 hours a day, 365 days of the year from the Quadrant in Milton Keynes. Our remit is to manage the real-time delivery of SCO products & services to our customers. This includes engineering haulage, materials, on track machines, infrastructure monitoring, seasonal treatment, HSEA reporting, site access services and lone worker monitoring.

Emergency

If there's a safety threat to you or to others such as:

- Animals, objects or people on or near the track
- Damage or fault at a level crossing
- A vehicle has hit a bridge
- A broken fence or open gate allowing access to the track

Please call Network Rail Emergency 24-hour helpline immediately: **03457 11 41 41**

To report a crime

Please contact the British Transport Police: **0800 40 50 40**, **999** or **Text 61016**

Coronavirus (COVID -19)

You will find many resources on this page: <https://safety.networkrail.co.uk/coronavirus-covid-19/>

Network Rail is working very closely with government, industry partners and health bodies to have the latest advice and messages available. In order to have the latest updates with this fast-changing situation we will be linking into.

Fatigue and caffeine

<h3>Caffeine warnings</h3> <p>Caffeine is not a long-term solution to fatigue Do not use if your doctor has told you to avoid it</p>	Breaks	Sleep
	<h3>Caffeine is in many things</h3> <ul style="list-style-type: none"> Hot drinks (tea, coffee, chocolate) Energy drinks (cola, Red Bull, Monster) Energy foods (chocolate, protein bars) Medicines (cold & flu, pain relief) 	<div style="text-align: center;">  <p>FATIGUE</p> </div> 

Read the label – it all adds up!

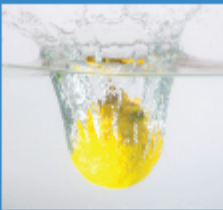

The Food Standards Agency recommends having no more than 400mg of caffeine a day (4 small cups of coffee). Pregnant and breastfeeding women should have no more than 200mg a day.

Important information about caffeine:

Caffeine has different effects on different people

Caffeine is harmful to health in large doses

Caffeine will NOT reduce your need for sleep. Its effects will wear off and you'll need the same amount of sleep as usual.

Caffeine facts:

The effects of 200mg of caffeine will last between 5-7 hours

If you are going to consume caffeine, have it at the start of your shift so that it doesn't disrupt your sleep.

Having caffeine and then having a short nap of 15-20 minutes can increase alertness and improve performance more than having caffeine alone.

When you add it all up, do you think you exceed the daily limit?
What have you noticed about how caffeine affects you?

Monitor and report fatigue

Look out for signs of fatigue in yourself and others. Tell your manager as soon as possible if you believe that you or a colleague might be too tired to work safely.

Fatigue and Sleep

Why is sleep important?

- It's the best way of fighting fatigue
- Our body needs sleep, to repair itself

Breaks

Sleep

FATIGUE

Health & nutrition

Work & commute

8 hours

Most people need this much sleep in every 24-hour period; some need a bit less and some need more.

5-6 hours

Getting less than this much sleep will seriously affect you. You will make more mistakes and you might fall asleep.

Struggling to sleep?

- Avoid light – it will wake you up. Use:
 - Sunglasses if you are commuting as a passenger.
 - Blackout blinds or a sleeping mask in your bedroom.
 - Avoid looking at devices with screens before bed.
- Don't eat a large meal just before you sleep, but don't go to bed hungry either.
- Avoid caffeine for at least 6 hours before bed, and don't use alcohol to help you sleep – it will mess with your sleep pattern.
- Don't smoke or exercise before bed.
- Reduce your chances of being woken up by noise.
- Make sure that your room and bed are as comfortable as possible.
- Wind down. Find a routine that works for you and stick to it.

How much sleep did you get last night?

What can you do to improve your sleep?

Monitor and report fatigue

Look out for signs of fatigue in yourself and others. Tell your manager as soon as possible if you believe that you or a colleague might be too tired to work safely.

Safety Bulletin

Line Block Irregularity 23/02/21

Ref:	WWB21-02 Works Delivery
Date of Issue:	030321
Location:	Single Branch Line at in Frome, Working / inspecting Willow Vale Bridge over bridge on the FNS 2 at 0m 28ch - 0m 32ch
Contact:	Helen Barnes

Overview

On the 23 March 2021 at 14:30 hours, a Balfour Beatty COSS attended site with one member from a design consultancy organization (AECOM) team. The COSS called the signaller once arriving to the access point. Hapsford Crossing and took the planned line block. The COSS and colleague had undertaken their inspection and were ready to egress track when they heard a train approaching, They got in to a position of safety with a minimum of 10seconds before the train passed them at a relatively low speed (circa 5-10mph). The train then came past and they acknowledge the driver. The COSS then phoned the signaller to question why there was a train coming through the line block. The COSS and Signaller then discussed mileages and the contents of the Safe Work Pack and the COSS realised that the line block was covering a section 2 miles away from their location. The line block had been requested and planned for 2m 5ch- 2m 50ch FNS2 and the bridge being inspected at 0m 30ch, and the access point was at circa 0m 10ch FNS2

- Discussion Points:**
1. General Point The COSS believed that the structure being looked at, and assessed, was at 2m 30ch FNS2 although its actual mileage was at 0m 30ch FNS2. Due to this, the Line block did NOT cover the site of work. Could this happen to you and how could you help to prevent it? This is now subject to a Level 2 Investigation
 2. You and others? What is your assurance that your Safe Work Pack is planned within the 019 hierarchy? Make sure as Person in Charge that you have discussed the SWP with the Planner.
 3. Culture? Do you Take 5 to review the SWP if you are not familiar with the location?

Machine Controller crushed by RRV 23/02/21

Ref:	WWB 01.03.21 Works Delivery Western
Date of Issue:	180321
Location:	Tregarne Track Renewal, Cornwall
Contact:	Helen Barnes

Overview

On the 1ST March 2021 at 08:40 a Machine controller, was struck and run over by a PC128 RRV. PC128 was loading an engineering train, sitting on the adjacent track. A dozer was pushing spoil towards the PC128, which was moving towards the dozer. The PC128 Machine Controller moved up onto the ballast shoulder into a potential blind spot from PC128 and slipped down the ballast shoulder in front of the PC128.

The PC128 rolled over the left ankle, causing a fracture of the Machine Controller, before stopping.

The Machine Controller and Operator were wearing dedicated communications, which have been quarantined for further inspection.

This is now subject to a Level 2 Investigation

Discussion Points:

1. General Point What could have prevented this accident? This is now subject to a Level 2 Investigation
2. You and others? What is your assurance that your work site and colleagues are always adhering to exclusion zones and can help everyone go home safely everyday? Could this happen to you or a colleague and what should we do to help prevent this?
3. Culture? What should you do if you see a colleague who could be harmed, because they may be absorbed or distracted by an activity?

Works Delivery Anglia (Building and Civils): Injury Caused by Crushing

Overview:

- On 27th March at approximately 00:04 operative sustained crushed left thumb while unloading a tool vault. First aid was provided at the site. The Injured Person (IP) was then taken to Ipswich Hospital A&E. X-Ray showed no broken bones but bruising was evident. The IP then returned to complete his shift with no lost time.
- IP and the other members of the team were briefed with regards to the activity taking place including the removal of a tool vault in advance of the works.
- Post incident the team stood down and were reminded of the requirement to 'Take 5' and to focus on the activity taking place - and to avoid distracting others or being distracted. The IP received the briefing when returning from A&E.

Immediate and Underlying Cause:

- Sometimes the simplest of tasks and those tasks that have been done perhaps hundreds of times can go wrong.
- As part of the Level 1 Investigations it was determined that the IP was rushing to complete the tasks and was also distracted by a co-worker.
- However, it was also established that there were no time constraints and no instructions to accelerate progress.
- The IP was very pleased to be able to return to work with nothing more than a bruised thumb, but it was agreed that the injury could have been a lot worse.

(Above) Tool Vault and lifting handle

Lessons Learnt

- Accidents can happen when doing the simplest of tasks – if time is short then STOP – TAKE 5 – reassess the work and time and agree an alternative plan/ options
- Distractions – don't be distracted by others – and don't distract others when they are undertaking tasks such as manual handling. Wait for a suitable time to talk.
- Complacency – it is easy to become complacent when undertaken routine activities – STOP – TAKE 5 – treat each activity as if it's the first time.
- Manual Handling – make sure the item to be lifted/ carried or pushed/ pulled has been assessed and

Line Blockage irregularity at Norton-On- Tees Signal Box

Summary of Incident:

On the 03/02/2021 the Signaller at Norton – On – Tees signal box completed a conversation with the Protection Controller (PC) arranging a line blockage and subsequently granted a line blockage with associated Authority number. During the conversation the Signaller asked the PC how long they needed to get clear of the line with the PC stating 2 minutes, the Signaller did not believe that he could offer 2 minutes without delaying the next train. The conversation then continued with the Signaller and the PC regarding who would accept any delay to trains, at which point the PC stated, “let’s leave it there and I will speak with my line manager.” This was in reference to accepting any delays.

Upon completion of the conversation, the PC believed that they had been granted a line blockage. However, the Signaller believed that the request for the line blockage had been abandoned and that the PC no longer wanted a Line Blockage even though the authority number was never cancelled and the line blockage not formally given up.

Lessons Learnt

- Always come to a clear understanding before issuing an authority number for a line blockage.
- Never issue an Authority number until all of the arrangements have been agreed, the protecting signal(s) are placed at danger and the reminder appliance(s) applied for the line/s to be blocked.
- Always repeat the message back so that the other person knows you correctly understand it and request messages be repeated back to you to ensure it has been understood.
- Never assume anything unless a clear understanding has been reached. If a clear understanding cannot be reached, make it clear what the next steps are and that protection cannot be given/line blockage has not been granted.
- Always take lead responsibility if you are the protecting signaller when granting a line blockage. It is your responsibility to ensure the message is understood.

Capital Delivery - Eastern CLIC Page 4

Sentinel card copies

Overview

It is understood that some Sentinel sponsors are withholding Sentinel cards from the people they sponsor, directing them instead to use printed copies or photo images stored on their phone.

The Sentinel Scheme Rules give examples of actions which would be a breach of those rules, including:

"Any event of presenting a falsified or copied Sentinel Card, or claiming a false identity for the purposes of trying to gain entry on managed infrastructure (MI), undertaking a training/assessment activity, presenting themselves for a medical examination or drug and alcohol test." (Rule 4.4)

Anyone intending to work on Network Rail and other infrastructure subject to the Sentinel Scheme Rules must present their original Sentinel card. Electronic or paper copies are not acceptable and will normally mean the holder is denied access to the work site.

If you are asked to swipe in an individual with anything other than a Sentinel card, please report this to SentinelInvestigations@networkrail.co.uk with the Sentinel number and they will contact the sponsor. Sponsors who encourage breaches of the rules will be held to account.

If you have any queries, please contact the Sentinel Helpdesk at sentinel@mitie.com or call 0330 726 2222.

OFFICIAL

Form: NR/L3/OPS/045/F3.27FA Issue 2 (Oct 2020)

TRANSFERRABLE LESSONS FROM SERIOUS OPERATIONAL INCIDENTS / INVESTIGATIONS

Issue:	01	Ref:	Points Run Through Carmarthen	Date:	18/02/2021
--------	----	------	-------------------------------	-------	------------

Summary of Incident:

On 14th February 2021 during WON 46 Possession item 210 engineering train 6C23 ran through 74 points at Carmarthen Bridge Junction in the reverse position causing serious damage. Both the signaller and PICOP overlooked confirming the position of the points within the possession as required in Rule Book Module T3 Section 2.2.1 and Rule Book Handbook 11 Section 4.4.1

The signaller assumed the PICOP would communicate any points movement requirements and the PICOP assumed that the points were in the normal position. Subsequently 6C23 correctly entered the possession with points placed as per signaller and PICOP agreement but the follow-on journey included traversing over 74 points which had been left in reverse.

Learning Points:

- Signallers and PICOP's must always agree and confirm the position of the points within the possession when agreeing the possession arrangements.
- For Movements into, out of and inside a T3 possession, make use of your route setting cards to ensure the points are in the correct position for any movement.
- Signallers and PICOP's should never assume the position of points to be correct for movements within the possession without checking (Take 5)

Security Notice

ATTEMPTED VAN-JACKING

Classification: **OFFICIAL**

Issued to: CNI Site Contacts, Station Managers and Station Support, Station Operations Specialist & Programme Manager, Security & Contingency Planning Specialists, Group Security, Director Responsible for Security, Route Security and Resilience Leads, Security Champions

Ref: SL069
Date of issue: 07 April 2021
Contact: groupsecurity@networkrail.co.uk

Overview

A member of Siemens staff was driving home alone in an unmarked white van at around 3:30am. Travelling along a quiet part of the A1 westbound approaching Monktonhall, two cars tried to ram the individual from the road and box them in, the driver was able to evade the blocking moves and continue to travel northbound, calling and meeting the Police at a Service Area.

Investigation has found that there had been several vehicles passing the parked van slowly earlier in the night and on one occasion, a car had passed at speed, and then stopped and returned travelling slowly past the parked van.

It has been reported that a number of vans have been stolen within the East Lothian area recently.

What you should do

- This type of incident has been known to occur in other parts of the UK. If you drive a van (liveried or not) as part of your job you should:
 - When parked in any area, keep doors and windows securely closed and be aware of anyone loitering in the area.
 - Be aware of anyone attempting to flag your vehicle down for any reason, drive to a well-lit or busy area to check your vehicle.
 - Be aware of changes to your vehicle when you return (such as folded in door mirrors) where you may be tempted to leave the vehicle with the keys in the ignition and get out to adjust / check.
 - Be aware of vehicles passing slowly, whether you are parked or travelling, particularly where there is a passenger in the passing vehicle. Where possible record the number plate and call 101 with the details.
 - If forced to stop at any time, try to do so in a well-lit area or open section of carriageway and do not offer resistance to the theft of your vehicle that may put you in further danger.

HEALTH AND SAFETY BULLETIN

BULLETIN TITLE	Chainsaw Injury		
TARGET AUDIENCE	IM, TRANSFORMATION, IDP'S AND SUPPLY CHAIN	REF NO.	AIW-HSEQ-L5-LRN-NOT-BUL-HS-000029
AUTHORISED BY	STEPHEN WOMACK	DATE OF ISSUE	19/04/2021

REASON FOR THIS HEALTH AND SAFETY BULLETIN

At 03.30 hrs on Sunday the 18th of April, a chainsaw operative undertaking low level de-veg at 20m33ch on the THT line, slipped and lacerated their hand on the blade of the chainsaw they were using. The operative received first aid on site before being taken to the University of Wales hospital in Cardiff. They were then transferred to Swansea to the specialist hand department at Morriston to undergo surgery as it was believed they may have damaged tendons in their hand. The de-veg works on THT were then stood down for the rest of shift. The operative came out of surgery at 19.30 hrs on Sunday. They had severed their tendons, nerves and arteries. The latest update from the contractor reports them as sore and tired but comfortable.

ACTION TO BE TAKEN

- Safety Stand Down to be taken on all De-veg work on the 19/04/21
- A briefing to be carried out to the De-veg workforce detailing the chainsaw accident
- All operatives are encouraged to "Shout Out" if conditions, equipment or working practices are unsafe
- All de-veg contractors to review their safety procedures/risk assessments around the use of chainsaws including:
 - Competence of operatives
 - Type of chainsaw
 - Maintenance of the chainsaw
 - Use of the chainsaw
 - Manual handling
 - Task Specific PPE
 - First Aid requirements

Further information can be found at <https://www.hse.gov.uk/treework/safety-topics/chainppe.htm>

An Event Review Meeting will also be held between the De-veg contractor and AIW to analyse the accident and form an investigation brief.

INCIDENT FAST FACTS

Brief Overview of Incident/Accident

On 16/5/21 at around 03.30 a.m., Pod-Trak were on tracking their MEWPs for OLE works.

When on tracking the 3rd MEWP it ran down the Canal Tunnel after on tracking at Argents RRAP, the MEWP ran approximately 600m but remained within the possession limits.

The team working with the MEWP were unharmed and have been taken for statements and a drugs and alcohol screening.

The MEWP is currently off track in quarantine awaiting inspection.

Currently it is believed to be a mechanical issue. The circumstances of the incident are currently under investigation and witness statements have been taken.

Potential Damage/Harm	Actual Damage/Harm	Will it affect ATF?
Fatal / life-changing injuries	No injuries	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Days absent (from time of injury until now)	Days absent predicted	Will it be a RIDDOR
N/A	N/A	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>

Working Safely around OLE in CRSA and Third-Party Isolations

25 kV ac overhead line equipment

Never assume equipment is isolated – always test before touch.

Overview

Please note all third party isolations shall be in accordance with NR/L3/ELP/29987 and for all CRSA isolations ensure that you are familiar with the contents and the additional requirements of the CRSA Overhead Line Isolation Planning Procedure OPS-PR-6204-RAIL.

What Happened?

On the 14 May 2021 at 00:38, a Linesman working in a mobile elevating work platform (MEWP) basket came into contact with live OLE. He suffered serious injuries and remains in hospital.

The MEWP operator also sustained a minor injury requiring hospital treatment and has since been discharged.

The team were undertaking routine planned work on overhead line adjustments for the Central Rail System Alliance.

The investigation has commenced following hand over from British Transport Police to the Office of Rail & Road (ORR). A Level 3 investigation is being led by Network Rail and the investigation team has been confirmed. We are co-operating with them along with the ORR.

The lessons learnt will be established during the investigation and these will be shared in due course.

Alert | HiPo | Update | Zero Tolerance

ZEROHARM
MAKE SAFETY PERSONAL

Actions to be taken

Lifesaving Rule for Test before Touch must be witnessed on 25kV and in accordance with the five-step process:

- 1) Test before earth – to ensure the equipment is de-energised before applying an earth.
- 2) Apply earths – eliminate the risk of residual voltage.
- 3) Always be sure the required plans and permits are in place before you start a job or go on or near the line. For 25kV equipment, this means ensure that you have a Form C in accordance with NR/L3/ELP/29987 which details the limits of the isolation.
- 4) Test before approach – a check that you are in the right location as per your Form C isolation limits.
- 5) Retest if you move beyond any inline OLE feature, move to a different track or work on a different conductor.

Working in a CRSA Isolation:

- Nominated persons must undertake a site walkout before the isolation to confirm safe working limits, identify electrical residual hazards, local features and control measures.
- Only trained and competent personnel to carry out safety critical tasks and this must be verified by scanning their Sentinel cards.
- All residual hazards must be identified on the OLE Form C permit including live adjacent equipment, abutting equipment or Live OLE crossing over earthed equipment.
- Nominated Persons issuing OLE Form C permits must be satisfied that the permit holder demonstrates a full understanding of the safe work limits, work to be undertaken, route of travel and electrical residual hazards stated on the OLE Form C permit by asking open-ended questions.
- Any Crane/ Machine controller that cannot demonstrate a clear understanding of the Form C briefing will be refused an OLE Form C permit.
- Where there is planned to be a shift changeover.
 - All Form C permits must be returned to the Nominated Person at the end of each shift with section Part 2 or Part 3 of the Form C completed as instructed.
 - All Form C permits will be briefed and issued to relieving staff at the start of each shift by the Nominated Person.

Alert | HiPo | Update | Zero Tolerance

ZEROHARM
MAKE SAFETY PERSONAL

- Any alternative arrangements for issuing an OLE Permit/Form C must be planned and approved by the relevant Delivery Unit or designated project engineer.

Working in a Third Party (Non-CRSA) Isolation

- Engage with third party isolation planners to establish what measures will be in place, not losing sight that the Form C permit is our primary method of protection.
- Request permission to use physical demarcation signs/lights as an additional communication measure on CRSA safe working limits (if they're not already being utilised).
- Fully establish whether the third party use blue lights for other uses to eliminate any potential confusion i.e. first aid station or to identify locations of defibrillators.
- CRSA to supply a competent Nominated Person to:
 - Manage third party engagement – PICOP / Whiteboard meetings.
 - Act as the main point of contact.
 - Management of CRSA support staff when providing assistance.
 - Undertake Task Briefing / risk assessment briefing to include site specific controls and briefing on the Life Saving Rules.
 - Engage with lead NP.
 - If agreed apply / remove demarcation lights for CRSA safe working limits. These should always be checked to confirm in fully serviceable condition with fully charged batteries.

Alert | HiPo | Update | Zero Tolerance

ZEROHARM
MAKE SAFETY PERSONAL

OHL Construction Activities (including OHL Adjustments):

- All OHL works must be subject to an assessment of electrical risk and must be suitably managed via a task specific risk assessment.
- Any works that are to be undertaken within close proximity to the Safe Working Limits or Residual Hazards must be highlighted and agreed with the Electrification & Plant Manager / OHL Construction Manager.
- A Test Before Touch schedule shall be produced highlighting all OLE in-line features.
- Any Machine Controller with MEWP attachment competence required to attend any OHL duty must also hold OLEC 1 (Access OLE construction sites) competence.
- Ensure that there are clear communications and briefings and confirmation from all staff that they understand the isolations limits and safe working areas. Use open questions to check understanding.

For further information regarding this Alert, please contact Christopher Branch, CRSA (NW&C) Electrification & Plant Manager via Christopher.Branch2@networkrail.co.uk or 07540 539 037 or Paul Kealy CRSA (Eastern) OLE & Electrification & Plant Manager via Paul.Kealy@Networkrail.co.uk or 07498 280 692
